

ANISH AMIT JHAVERI

FULL-STACK ENGINEER

Austin, TX • (817) 371-0013
aj.jhaveri@gmail.com
github.com/aj-jhaveri
linkedin.com/in/anishjhaveri360

Full-Stack Engineer with extensive experience designing, building, and deploying web applications, server configurations, and database integrations. Evolved from a prior background in corporate accounting and compliance auditing into web development (Drupal/CMS) starting in 2009, establishing an independent software practice (AW Technologies) in 2010. Proficient in Node.js, JavaScript, and SQL databases, with recent team experience delivering TypeScript, NestJS, and React/Next.js features in shared monorepos. Focuses on local AI workflow layers, vector database search, and system integrations since 2025.

TECHNICAL SKILLS

Core Systems & Integration (10+ Years)	JavaScript (ES6+), Node.js, Express, Relational Databases & SQL (PostgreSQL, MySQL), Payment Gateways (Stripe, Authorize.Net), REST APIs, HTML5/CSS3
Systems & DevOps	VPS Management (Linux), Web Servers (Nginx, Apache), SSL/DNS, Docker, GitHub Actions (CI/CD), Azure Container Apps
Recent Frameworks & Languages	TypeScript, NestJS, React, Next.js, Prisma ORM (Database Migrations), Zod
AI Engineering (Focused Since 2025)	Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), Vector Similarity Search (pgvector), Supabase, Google Gemini API, Prompt Isolation (systemInstruction), Token Counting
Testing	Vitest, Jest, Supertest, Playwright

PROFESSIONAL EXPERIENCE

SCOUTLOCAL • Austin, TX

Full-Stack Engineer (Contract)

July 2025 – Dec 2025

- Modern CI/CD & Testing:** Built and maintained comprehensive unit, integration, and E2E testing suites (Vitest, Jest, Supertest, Playwright) integrated into automated GitHub Actions pipelines to validate code quality before deployment.
- Git & Monorepo Workflows:** Participated in team code reviews, branch/PR strategies, and continuous integration workflows to ensure clean main-branch deployments.
- Performance Optimization:** Reduced authentication middleware latency from 300ms to <1ms by replacing repeated JWKS network lookups with local public-key verification caching.
- API Cost Control:** Restructured Mapbox GL viewport integrations with debouncing and caching layers, cutting geographic API query costs by 80%.
- Data Integrity & DB Workflows:** Resolved data-pipeline issues by restructuring Prisma database operations into atomic database transactions, preventing orphaned records.
- AI Integration:** Contributed to semantic search systems using Azure OpenAI embeddings, PostgreSQL pgvector, and full-text indexes.

AW TECHNOLOGIES (Slake Design) • Austin, TX

Software Engineer & Consultant

2009 – Present

- AI & Search Systems (2025 – Present):** Designed and built local/hybrid RAG search systems utilizing PostgreSQL pgvector, Gemini embeddings, and context-window token optimization layers.
- Server Administration & DevOps:** Configured, deployed, and maintained Linux VPS hosting environments using Nginx and Apache web servers; managed DNS routing, SSL configurations, and hosting deployments.
- Full-Stack & Web Applications:** Developed custom web applications, custom templates, and integrations for various content management systems (CMS) tailored to client business workflows.
- E-Commerce & Payment Pipelines:** Engineered custom checkout flows, secure payment integrations (Stripe, PayPal, Authorize.Net), automated subscription billing loops, and various e-commerce platform integrations.

- **Business Consulting & Strategy:** Sold, scoped, and developed end-to-end internet applications and digital marketing strategies for small-to-medium business clients, increasing revenue and user engagement.
- **Backend & DB Workflows:** Managed SQL databases (PostgreSQL, MySQL), built REST APIs using Node.js and Express, and automated data workflows.
- **Drupal/CMS (2009 – 2010):** Designed, built, and launched Drupal websites, custom themes, and e-commerce setups for local businesses and independent clients.

SELECTED AI PROJECTS

DEPLOYED RAG SEARCH ENGINE • Node.js, Express, Supabase, pgvector, Gemini API

slakedesign.com/demo • github.com/Slake-Design/slakedesign-rag

- **Token Budgeting:** Implemented token-aware context management using Gemini's countTokens() API to dynamically prune chunks, keeping prompt sizes under 3,000 tokens while preserving complete sentences.
- **Security & Grounding:** Isolated instructions via Gemini's systemInstruction parameters to reject off-topic queries, and configured Multer upload limits (10MB) to mitigate OOM risks.
- **Performance & Evaluation:** Created a read-only retrieval evaluation suite measuring search latency (513.63 ms baseline) and hit rates (75.00% baseline).

TYPE-SAFE MODEL CONTEXT PROTOCOL (MCP) SQLITE BRIDGE • TypeScript, SQLite, Zod github.com/aj-jhaveri/mcp-sqlite-bridge

- **Agent Self-Correction:** Implemented custom error-formatting middleware that compiles raw Zod validation errors into flat, readable strings, allowing LLM clients to self-correct invalid inputs in the subsequent conversational turn.
- **Security Guardrails:** Prevented SQL injection attacks by strictly binding query parameters and implemented a configurable READ_ONLY safety boundary to restrict write access.
- **Testing & CI:** Implemented automated unit and integration test coverage using Vitest, run via continuous integration (CI) workflows on GitHub Actions.

PRIOR EXPERIENCE

- **Green City Solar** • Accounting Manager (2009 – 2012) • Managed day-to-day accounting operations while developing web properties, combining financial duties with online systems and internal tooling.
- **Apple, OneWest Bank, Contracts** • Independent Contractor (2007 – 2010) • Short-term projects covering financial analysis, retail finance audit automation, and corporate/partnership tax preparation.
- **National Financial Partners** • Internal Controls Analyst (2008) • Reviewed broker-dealer and insurance subsidiary processes for FINRA and Sarbanes-Oxley (SOX) compliance, documenting process flows and updating control narratives.
- **Realtex Development Corporation** • Senior Construction Accountant (2007 – 2008) • Set up entities in accounting systems, reconciled accounts, and prepared financial statements, draw packages, budgets, and forecasts.
- **Vignette (OpenText)** • Financial Reporting Accountant (2007) • Prepared SEC filings (Forms 10-Q, 8-K) and supporting schedules.
- **KPMG LLP** • Assurance Associate (2006) • Performed audit fieldwork for hedge funds, private equity funds, and public registrants.
- **XTO Energy, Inc.** • Revenue Accounting Intern (2005) • Reconciled production revenue allocations for overriding royalty interest owners.
- **US General Services Administration** • Accounting Co-op (2004) • Managed accounts receivable reversals and voucher packet approvals.

EDUCATION

TEXAS CHRISTIAN UNIVERSITY • Fort Worth, TX

Master of Accounting

B.B.A. in Finance & Accounting
